# M5Stack Core2 MicroPython (emlearn/ulab) — Release Notes

Generated: 20250814-062650

Highlights:
• MicroPython v1.20.0 with ulab and emlearn modules (stub for emlearn_iir)
• Built with ESP-IDF 4.4 toolchain (gcc 8.4.0)

Deliverables in the final release ZIP (run make_release_zip.sh locally):
  - artifacts/bootloader.bin, partition-table.bin, micropython.bin
  - artifacts/micropython-thonny.bin (merged)
  - source/mod_emlearn_iir.c, source/micropython.cmake
  - SHA256SUMS.txt, BUILD_INFO.txt

Notes:
• Ensure the correct IDF environment to avoid 'esp_adc_cal' resolution issues.
• Use MP_REGISTER_MODULE with the 2-argument form.
• Prefer system Python's esptool for merge/flash.
